

Thank you for speaking at our event.

You may choose to use the RCPA branded background image for the duration of your presentation. **Please note:** this is not a requirement and there are guidelines for its use:

1. You must have a empty wall or green screen behind you. It should be clear of pictures, windows, shelves etc. This ensures optimal performance and prevents image distortion.
2. Ensure you have adequate lighting around you. Natural light is best and it should be in front of you, not coming from behind.

Microsoft provides tutorials on how to change your background [here](#).

If you are not able to satisfy the requirements, an alternate option is to use the 'blur' feature. The video above also describes how to use this feature.

Please see our [Virtual Event Guide](#) for videos and tips to enhance your virtual presentation.

If you need further assistance, please contact us: liveevents@rcpa.edu.au
