

SPR*/ICCR ⁱ	Data element	Response				
	Fresh tissue received	No	Yes	<i>If yes, describe any additional tests flow cytometry/microbiology/cytogenetics/biobanking performed</i>		
	Procedure	Text		<i>As stated by the clinician</i>		
S2.03	Specimen type	Text				
	Specimen integrity	Intact		Disrupted, describe _____		
S2.04	Specimen size	__x__x__mm				
S2.04	Spleen weight	__g				
	Separate blood clot weight, if present	__g				
	Hilar lymph node	Absent	Present	If present, maximum dimension __mm		
	Specimen description					
	Outer surface	Normal	Abnormal			
			Irregular	Nodules	Plaques	Laceration(s)
			Describe size _____mm and location_____			
	Parenchymal lesions	Absent	Present	Number __		
	<i>For each lesion: (if >1 designate accordingly)</i>					
	Lesion size	__x__mm		Or if >2 range of sizes	__x__mm to __x__mm	
	Lesion site	Subcapsular	Parenchyma			
	Lesion description	Solid nodule	Multinodular	Cystic	Miliary nodules, describe variation in sizes	
G2.03	Other relevant macroscopic information	Text		<i>E.g. any additional orientation; specimen integrity (if disrupted) etc.</i>		
	Block identification key	Text		<i>Describe nature and site of blocks</i>
