

SRP*	Data element	Response		
	Fresh tissue received	No	Yes	<i>If yes, describe any additional tests/ frozen sections/biobanking performed</i>
S2.04	Specimen type	Text <i>Record the procedure as stated by the clinician</i>		
		Wedge resection Segmentectomy	Lobectomy Pneumonectomy	Other, describe
	Anatomical components present & specimen dimensions	Lung __x__x__mm Pleura	Extrapulmonary tissues Hilar soft tissue __x__x__mm Parietal pleura Mediastinal tissue __x__x__mm Pericardium Diaphragm __x__x__mm	Other, describe
	Tumour present	Absent		Present
S2.07	Number of tumours	—		
	<i>For each tumour: (if >1 designate accordingly)</i>			
S2.08	Maximum tumour diameter	__mm		
S2.06	Tumour site	Right upper lobe Right middle lobe	Right lower lobe Left upper lobe	Left lower lobe Main bronchus
G2.02	Tumour location	Central, <i>describe if possible</i> Mainstem bronchus Lobar bronchus Segmental bronchus	Peripheral	
S2.10	Distance of tumour from the bronchial resection margin	__mm		
S2.09	Extent of spread of tumour	Text	<i>Hilar soft tissues, parietal pleura, chest wall, mediastinal tissue, pericardium & diaphragm must be assessed and sampled if present.</i>	
	Description of pleura overlying a peripheral tumour	Text		
S2.12	Non-neoplastic lung	Text	<i>Describe</i>	
S2.11	Lymph nodes	Not received	Received	<i>Record number per cassette.</i>
	Number of nodes (per site)	—		
	Site(s)	Text		
G2.03	Other relevant macroscopic information	Text	<i>E.g. any additional orientation; specimen integrity (if disrupted); relationship of tumour to other structures included in "anatomical components"</i>	
S2.05	Nature and site of blocks	Text	<i>Describe</i>
