

About us

Primary Health Care is one of Australia's leading publicly listed healthcare companies. The Primary pathology subsidiary **SDS Pathology** is an amalgamated business comprised of a number of well-established brands across Australia.

In Victoria, **Dorevitch Pathology** is one of Australia's leading comprehensive medical laboratory and pathology services. We have the largest spectrum of pathology testing services and coverage of collection centres dedicated to meeting the needs of Victorian doctors and their patients. We are recognised for serving rural and regional communities with more laboratories and collection centre services in these regions than any other pathology provider in the state.

About the role

The successful applicant will be required to:

- Provide supervision of the Microbiology department.
- Provide expertise in Microbiology and report cases in a timely manner.
- Actively participate in the quality control and assurance activities.
- Participate in Infection Control and Antimicrobial Stewardship Committees' meetings.

You will be leading a team of supportive pathologists who are focused on providing a quality service to the local community.

Our main laboratory is based in Heidelberg (VIC), and a team of respected pathologists are at hand in the larger Dorevitch Group for consultation and support.

About you

- Post-graduate pathology experience of 5 years or more.
- Proven experience in leading a team.
- Proven experience in setting strategy for department.
- Candidates must have qualifications recognized by the Royal College of Pathologists (Australasia) and be eligible for Medical registration with the Australian Health Practitioner Regulation Agency (AHPRA).
- Innovative and analytical approach to planning and implementation.
- Working knowledge of quality systems and laboratory operations.
