

SPR*/ICCR ⁱ	Data element	Response		
	Fresh tissue received	No	Yes	<i>If yes, describe any additional tests/ frozen sections/biobanking performed</i>
	Procedure	Text <i>As stated by the clinician</i>		
		Nodulectomy Unilateral thyroidectomy		Subtotal thyroidectomy Total thyroidectomy
	Specimen laterality (if applicable)	Left	Right	Unorientated Completion thyroidectomy Other, describe
G2.07	Parathyroid glands	Absent (or unidentified)		Present
S2.10	Specimen dimensions	Right lobe __x__x__mm		Left lobe __x__x__mm Isthmus __x__x__mm
G2.04	Weight of specimen	__g		
G2.05	Thyroid capsule	Intact	Not intact	
	Capsular surface description	<i>Describe and measure max. dimension of abnormalities present</i>		
		Adhesions __mm Fibrotic __mm		Purulent __mm Nodular __mm Tumour present __mm
	Focal lesions	Absent		Present
S2.11	Multiple lesions	No	Yes	Number __
	<i>For each tumour: (if >1 designate accordingly)</i>			
S2.11	Size in greatest dimension	__mm		
S2.11	Location	Right lobe Left lobe	Superior Central Inferior	Isthmus
S2.11	Appearance	Solid	Cystic	
S2.11	Borders	Encapsulated	Thick Thin	Infiltrative
S2.11	Distance from nearest excision margin	__mm		
G2.06	Appearance of other portion of thyroid	Text <i>Describe the non-lesional thyroid tissue.</i>		
G2.07	Lymph nodes	Absent		Present <i>If present, indicate type of nodes. Record number per cassette.</i>
G2.08	Other relevant macroscopic information	Text <i>E.g. any additional orientation; specimen integrity (if disrupted); relationship of tumour to other structures included in "anatomical components"</i>		
	Block identification key	Text <i>Describe nature and site of blocks</i>
