

SPR* / ICCR ⁱ	Data element	Response			
	Fresh tissue received	No	Yes	<i>If yes, describe any additional tests/ frozen sections/biobanking performed</i>	
S2.03	Type of resection	Oesophago-gastrectomy Total gastrectomy	Subtotal gastrectomy, proximal Subtotal gastrectomy, distal	Other, specify	
S2.05	Specimen dimensions, <i>length of each anatomical component</i>	Stomach, greater curve Stomach, lesser curve	__mm __mm	Oesophagus Duodenum	__mm __mm
	<i>For each tumour: (if >1 designate accordingly)</i>				
S2.06	Macroscopic tumour site (choose all that apply)	Cardia Fundus Antrum	Body Pylorus Greater curve	Lesser curve Anterior wall Posterior wall	
S2.08	Macroscopic tumour type	Early cancer (pT1/pT2) Type 0-I Protruded Type 0-IIa Elevated Type 0-IIb Flat Type 0-III Excavated Type 0-IIc Depressed		Advanced cancer (pT3/pT4) Type I Polypoid Type II Fungating Type III Ulcerated Type IV Infiltrative	
S2.07	Tumour size (maximum tumour diameter)	__mm			
S2.09	Distance from tumour to nearest proximal or distal margin (cut end)	__mm			
S2.10	Distance from tumour to the circumferential resection margin <i>(proximal/cardia tumours)</i>	__mm	Not applicable		
S2.11	Serosal appearance	Text			
	Lymph nodes				
G2.03	Other relevant macroscopic information	Text	<i>E.g. any additional orientation; specimen integrity (if disrupted) etc.</i>		
S2.12	Describe nature and site of blocks	Text
