No on-call or weekends. Afternoons off are negotiated week to week between consultants and registrars.

One on one teaching is daily and continuous. Pathologists and registrars are reporting together in same office “as you go”.

Time can be allocated throughout the week to an agreed project but flexibility as to which afternoon may be required according to workflow from week to week.

Free to attend the additional local lectures, teaching sessions and webcasts (e.g. transfusion)

Actively promoted to contribute abstract/oral to national meetings.
