

Dr Joanna Glengarry (Anatomical Pathology) 2013 RCPA Foundation Travel Grant

Project title: Travel to Edinburgh to be immersed in an intensive forensic neuropathology training program with Dr Colin Smith at the Centre for Brain Sciences (University of Edinburgh)

"Being a recipient of an RCPA Foundation Travel grant will enable me to travel to the Centre for Brain Sciences at the University of Edinburgh, Scotland, which provides dedicated forensic neuropathology services for Scotland and is one of the busiest neuropathology practises in Europe. I will have the opportunity to see a wide range of pathologies in both adult and paediatric brains, participate in the examination and reporting of neuropathology cases, visit the National CJD Surveillance and Research Unit and increase my expertise in the field of forensic neuropathology. It will be a fantastic opportunity to work with some of the world's top neuropathologists including Dr Colin Smith and Professor James Ironside. The Foundation's support for new Fellows such as myself is extraordinarily generous and it is an honour to have been awarded this grant. It will be of tremendous assistance in allowing me to undertake this further training".
