

Uterus for endometrial malignancy

Macroscopic reporting dictation template

SPR*/ICCR ⁱ	Data element	Response			
	Fresh tissue received	No	Yes	<i>If yes, describe any additional tests/ frozen sections/biobanking performed</i>	
	Procedure	Text		<i>As stated by the clinician</i>	
S2.07	Ovary (<i>record for both left and right</i>)	Absent	Present	Laterality _____	__x__x__mm
		Surface	Normal	Abnormal, <i>describe</i>	Cut surface Normal Abnormal, <i>describe</i>
S2.08	Fallopian tube (<i>record for both left and right</i>)	Absent	Present	Laterality _____	__x__mm <i>Describe</i>
S2.05	Omentum	Absent	Present	__x__x__mm	Proportion of fat replaced by tumour __% (<i>est.</i>)
S2.06	Peritoneal biopsies; description & dimensions (<i>per site</i>)	<i>Describe</i>		__x__x__mm	
S2.09	Uterus received	Intact		Opened	
	Serosal surface	Normal		Abnormal	<i>Describe</i>
S2.11	Measurement of uterus	__x__x__mm	<i>Midline fundal-serosa to ectocervix x max. intercornual x max. anterior to posterior</i>		
	Gross description	<i>Text</i>			
S2.10	Weight of uterus	__g			
	<i>For each tumour: (if >1 designate accordingly)</i>				
S2.12	Site of tumour (<i>more than one may apply</i>)	Anterior endometrium		Fundal endometrium	Left cornual recess
		Posterior endometrium		Isthmus	Right cornual recess
S2.12	Tumour dimensions (<i>superior-inferior x transverse x thickness</i>)	__x__x__mm		<i>Thickness = exophytic + endophytic</i>	
	Tumour appearance (<i>more than one may apply</i>)	Exophytic		Endophytic	Haemorrhagic Necrotic
	Myometrial invasion	No	Yes	Max. depth of invasion __mm	Thickness of adj. myometrium __mm
	Endometrial thickness	__mm			
G2.05	Distance of endometrial tumour from the inferior surgical margin	__mm			
	Cervical involvement	No	Yes	<i>If tumour is present record the elements listed below</i>	
S2.15	Distance from the inferior surgical margin	__mm		<i>Distance of cervical tumour to the inferior surgical margin</i>	
S2.15	Maximum depth of cervical wall invasion	__mm			
	Other endometrial abnormalities	No	Yes	Polyp	Other, <i>describe</i>
	Thickness of uninvolved cervical wall	__mm			
	Lymph nodes	Not received		Received	<i>Record number per cassette.</i>
S2.04	Per site: Description	<i>Text (description e.g. macroscopic involvement)</i>			__ (<i>total number of nodes</i>)
S2.04	Total number of nodes, maximum diameter/range	__ (<i>total</i>)		__ to __mm (<i>range of maximum diameters</i>)	
G2.06	Other relevant macroscopic information	<i>Text E.g. any additional orientation; specimen integrity (if disrupted)</i>			
	Block identification key	<i>Text Describe nature and site of blocks</i>
