

Short testimonial

"The support of the Kanematsu award, has been incredibly valuable to me. It has allowed me to continue my research into the inflammatory mediators of thrombosis of small blood vessels. The support of this generous grant has provided immense financial assistance for our laboratory to ensure we have all the available resources required to continue this work. Thank you to the Kanematsu fund, in memory of Fusajiro and his wife Sen, and the RCPA for their generous support to whom without research like mine would not be possible."
